Professional Summary

Frontend Engineer with **4+ years of experience** building scalable SaaS web applications using **React**, **Next.js**, and **TypeScript**. Experienced in **Design Systems**, **Micro Frontends**, and **AI-assisted development** for high-performance, user-friendly interfaces, with strong **communication**, **cross-team collaboration**, and **technical leadership**.

Technical Skills

Frameworks and State Management: React, Next.js, Redux, Context API
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Styling: Tailwind CSS, LESS
Frontend Engineering: Component Architecture, Design Systems, Micro Frontends, Performance Optimization
AI-Assisted Development: Cursor, Claude, GitHub Copilot, MCP Servers

Work Experience

Brevo **Jul 2025 – Present**
Software Engineer *Noida, Uttar Pradesh*

- Delivered **Brevo's V5 pricing model dashboard** enabling subscription plan configuration and checkout flows for **500K+ businesses** across **180+ countries**.
- Boosted engineering productivity by **2×** by pioneering **AI-augmented workflows** (**Claude, GitHub Copilot**) for automated unit test generation, complex **code refactoring**, and advanced **prompt engineering**.
- Architected enterprise **Two-Factor Authentication (2FA)** using **Module Federation** and **Webpack**, enabling secure authentication for corporate master accounts.
- Optimized **Core Web Vitals (LCP, FCP, TBT)** through advanced code-splitting and performance tuning, improving load performance across **85%+ production pages**.
- **Mentored** mid-level developers and led **architectural reviews** to align **frontend infrastructure** with long-term business goals.

CARS24 **Jan 2024 – Jul 2025**
SDE 1 Frontend *Gurugram, Haryana*

- Engineered **Dev Space**, a self-service platform using **Next.js**, **GraphQL**, and **TypeScript**, replacing legacy Service Desk workflows.
- Designed **20+ reusable UI components** within the **CARS24 LEGO Design System**, improving interface consistency and reducing defects by **30%**.
- Enhanced **SEO rankings** and user experience with **Server-Side Rendering (SSR)** and dynamic routing, achieving sub-second **Time to Interactive (TTI)**.

Accolite **Apr 2022 – Dec 2023**
Software Engineer *Bangalore, Karnataka*

- Implemented driver-facing features for **Namma Yatri**, a leading **auto-rickshaw platform**, using **React and TypeScript** to support transparent pricing and large-scale driver onboarding.
- Strengthened code reliability by integrating **SonarQube** into CI/CD pipelines and enforcing **TDD** practices, reducing production bugs by **25%**.

Education

Nitte Meenakshi Institute of Technology **2018 – 2022**
B.Tech in Information Science and Engineering, CGPA: ***9.47*** *Bangalore, Karnataka*

Projects

Hirrd | React, Tailwind CSS, Clerk Authentication, ShadcnUI **Mar 2022**

- Created employer dashboards and user profiles with JWT authentication, resume upload, and advanced job filtering.

Covid-19 Tracker | React, Node.js, Express, MongoDB **Nov 2021**

- Implemented a real-time exposure alert system using Bluetooth and GPS with social graphs for user interactions.

Awards

Certificate of Appreciation
For exceptional contribution and technical ownership in delivering the **V5 Pricing** release at **Brevo**.

Ace of Accolite
Recognized for dedication and product ownership in high-quality product delivery.
